To: The Board of County Commissioners

From: Valentine L. Jaroch

Dear Sirs:

I am a Trustee on the Ocqueoc Township Board. I have followed with interest the published comments and opinions regarding Wolverine Power's intent to build a coal fired power plant here in Rogers City.

I also note that Mr. Bruder who is currently chairman of the County Board of Commissioners, is also Chairman of the Presque Isle Electric & Gas Board, (which provides electric power to residents of Presque Isle County with the exception of Rogers City residents who obtain theirs from Consumers Power) and serves on the Board of Wolverine Power who currently provides electric power to the five co-op's in northern lower Michigan.

I would like your comments as to the appropriateness of Mr. Bruders position as it relates to this situation.

Respectfully:

Valentine L. Jaroch
